

Code Wheel

Cut out the two circles below, Then join them together using a paper fastener in the middle of each circle.

Write all the letters of the alphabet in any order on the outer wheel.

Move the centre wheel around, until you are happy with the letter pairs.

To make your own code, write down your message. Translate from the outer wheel letters, to the code letter, which is level on the inner wheel. Remember, do not move the wheel, once you have started making your message.
