

How to produce your own Islamic Tile

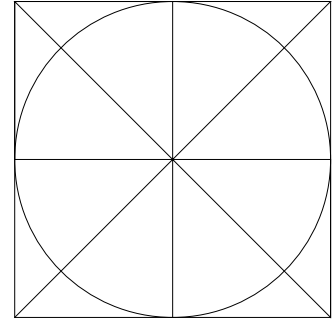

First draw a square of side length 8cm.

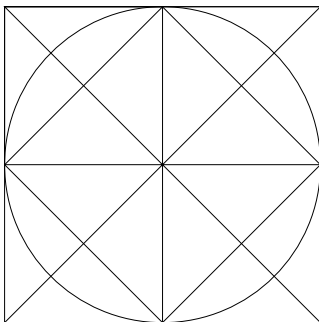

Now mark half way on each side and add the lines below.

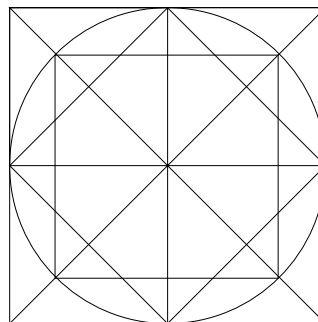

Placing a compass on the point where all the lines cross, draw a circle of a radius 4cm.

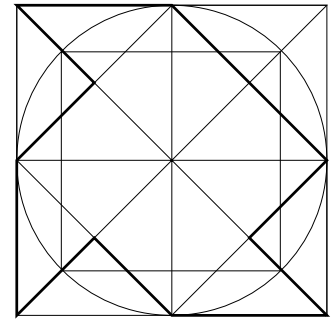

Now draw a square by joining up the centre points of each side.

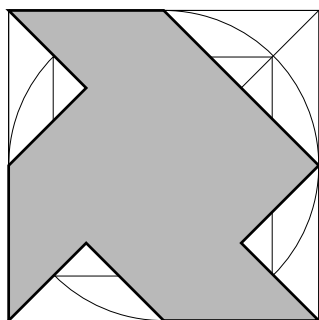

Lastly join up the points where the diagonal lines meet the circle.

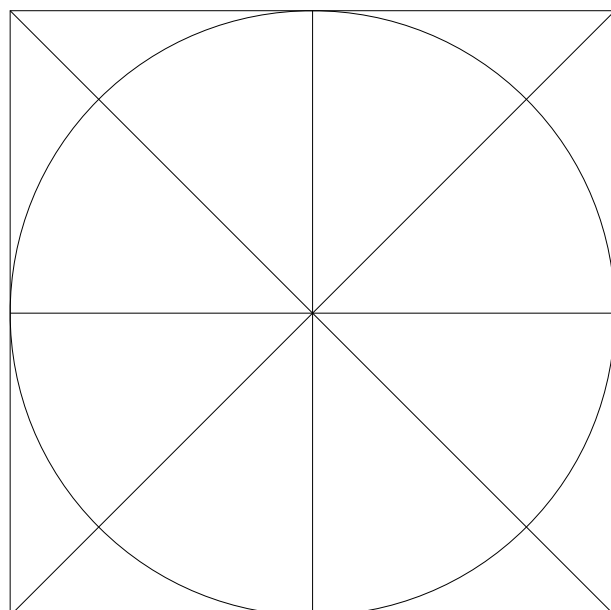

Now highlight a pattern following only the construction lines you have drawn.

Now colour in the inside of the shape you have drawn.

You are now ready to produce your Islamic pattern

*A template of the correct size so there is no need to use a compass.
